

ELEVATIONS

Appearance

The visual character of the buildings have been designed to create a distinctive appearance whilst sitting comfortably within its surroundings. Variation in storey heights, fenestration detail and material usage promotes interest and articulation to reinforce the strong sense of place created within the scheme.

Oak & Cedar Villas - Proposed North Elevation

Oak & Cedar Villas - Proposed West Elevation

Scale

The scale and positioning of the buildings have been carefully assessed to provide optimal use of the site for much needed affordable housing whilst respecting the relationship to neighbours and the wider character of the area.

The relationship to Montacute school is a key consideration. Storey heights have been reduced where the proposals bound with the school and balconies have been located to prevent overlooking.

Oak & Cedar Villas - Proposed East Elevation

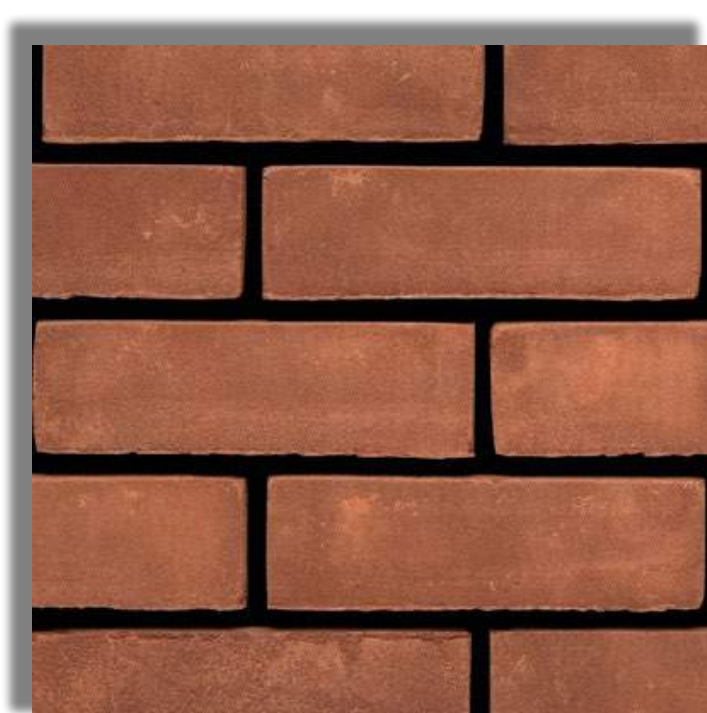

Oak & Cedar Villas - Proposed South Elevation

Materials

A palette of sustainable, high quality and durable materials have been selected to compliment and enhance the proposal's strong visual appearance. These materials are inspired by and reference the site and the local area, routing the design in Poole's history whilst seeking to update their use and application.

Blue Brick

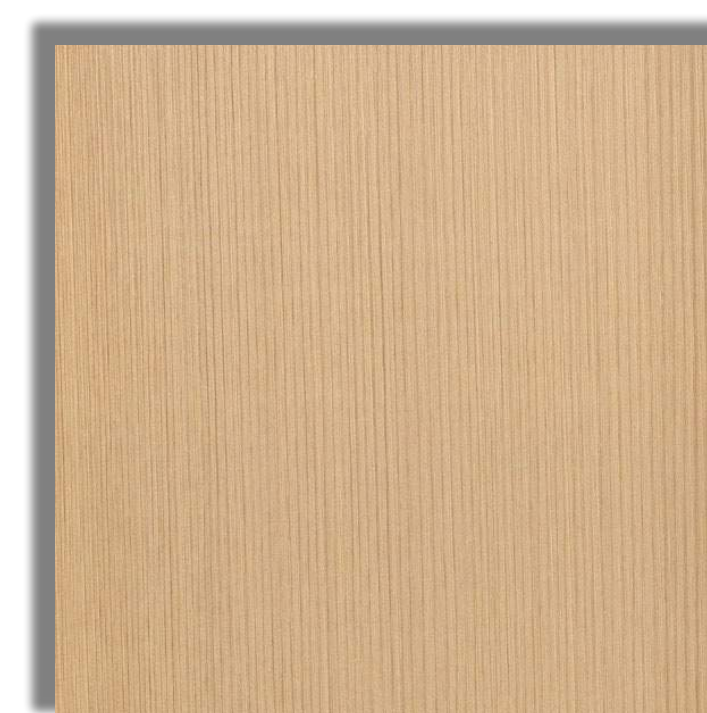

Dorset Red Stock

Larch

Sweet Chestnut

Western Red Cedar

Oak

Milled Steel
